The TNE Programme is linked to the German Jordanian University.

Since its foundation in 2005, the German Jordanian University has been continuously intertwined with the funding programme "Transnational Education - Binational Universities" (TNE) of the German Academic Exchange Service (DAAD). The Federal Ministry of Education and Research of the German Government provides the funds for the programme. Magdeburg-Stendal University of Applied Sciences is the managing project party on the German side. It has set up its own GJU Project Office (PO), whose team is in intense daily exchange with GJU. As GJU's core partner, Magdeburg-Stendal University of Applied Sciences manages all TNE- and pending scholarship funds and steers the university's further development together with GJU.

Strengthening GJU's German dimension by fostering the mutual exchange of students, faculty, and administrative staff is at the heart of TNE funding: The Flying Faculty Programme enables German lecturers to teach at GJU regularly and to intensify teaching and learning relationships between German university partners and GJU. The Staff Mobility Programme allows GJU lecturers and administrative staff to teach and work for a month at a German partner university. At the same time, transnational student groups are supported in collaborating on applied-oriented yearly projects. Regular meetings of eight Joint Academic Networks of GJU and its German partners, events to strengthen university-industry relations and knowledge transfer, and special scholarship programmes for third-country students from the region round off the funding. In addition, GJU's unique selling point, the German Year for all BA students, is flanked by German scholarships for exceptionally high-performing students. In turn, the high number of GJU students going to Germany each year is matched by an increasing number of international students coming to GJU, thereby promoting GJU's and the TNE project's radiance in the Arab world.

The German Jordanian Discourse Series

The German Jordanian Discourse Series highlights points of shared interest in the German and Jordanian scientific communities. Based on the mission of the German Jordanian University to further enhance the excellent scientific relationship between the two countries, it offers a platform for the exchange of ideas and opinions as well as aims to contribute to the development of both systems.
